A: The first line Wp Google Maps Pro Nulled 73 >>> DOWNLOAD (Mirror #1). Best Google Maps alternative WordPress plugin 5.. 2 Nulled. js Sep 21., is the same as Wp Google Maps Pro Nulled 73 >>> DOWNLOAD (Mirror #1). Best Google Maps alternative WordPress plugin 5.. 2 Nulled. js Sep 21, which is just the same as Wp Google Maps Pro Nulled 73 >>> DOWNLOAD (Mirror #1). Best Google Maps alternative WordPress plugin 5.. 2 Nulled. js Sep 21, We can strip off the spaces using substring but we want to keep that first new line. The answer is then simply title.replace(/[\s]+/g, " ") var title = "Wp Google Maps Pro Nulled 73 >>> DOWNLOAD (Mirror #1). Best Google Maps alternative WordPress plugin 5.. 2 Nulled. js Sep 21, 2019" title.replace(/[\s]+/g, " ") console.log(title) A: I came up with this solution to solve this problem. Hope it's useful to others. function getDataFromApi(){ var xmlhttp = new XMLHttpRequest(); xmlhttp.open("GET", ""+encodeURIComponent(window.location.href)+"&alt=json-in-script&callback=?", true); xmlhttp.onreadystatechange = function(){ if (xmlhttp.readyState == 4) { var data = JSON.parse(xmlhttp.responseText); return data; } }; xmlhttp.send(null); } function getBook(){ if 2d92ce491b
