Jul 5, 2017 . © [ D ] Download.. A Windows software that allows you to extract EX4 files (.exe. EX4 to MQ4 Decompiler 4.0.401.1 cracked . Q: golang regex capture all text in between two words Here's my input string: package main import ( "regexp" "fmt" ) func main() { reg := regexp.MustCompile("d+") // Question: What do I need to write here? s := "1234567,1234,345,12,78" var nums []int reg.FindAllString(s, -1) for i := range nums { fmt.Println(nums[i]) } } What I want to do is to only capture the following items: the integer after the comma the integer before the comma I tried many things with regex but I'm still having a hard time figuring out how to do it. UPDATE: Here's what I came up with but I'm still not satisfied with it, there should be a better way to do it: func main() { reg := regexp.MustCompile("(d+),(d+),(d+)") // Question: How to make this expression work? s := "1234567,1234,345,12,78" var nums []int reg.FindAllString(s, -1)
