Category:Tamil-language literature Category:Grammar booksQ: ng-repeat nested ng-repeat child In my html I have the following: `{{c.name}}` Which outputs the following: Alice Bob Charlie What I want to do now is output like this: Alice Bob Charlie Instead of like this: Alice Charlie Bob I am trying to use an ng-init, but no luck. A: I created a Plunker that shows how to get what you're looking for. I hope it helps. HTML: `{{c}} {{i}}` JavaScript: `var app = angular.module('app', []); app.controller('MyController', function($scope) { $scope.items = [ { "categories": ["Alice", "Bob"] }, { "categories": ["Charlie"] } ]; });` [Patient-physician communication about medications and over-the-counter drugs]. Recent statistics from the US Food and Drug Administration (FDA) and the National Ambulatory Medical Care Survey (NAMCS) show that the percentage of patients taking at least one prescription drug has increased from 89% in 2000 to 91% in 2006. For almost all diseases, recommended drug therapies are available and frequently used. The availability of multiple drug choices may decrease the likelihood that patients understand the
