Keywords: extended star -grid, power grid, electromagnet, star -power, reactor, machine. In this paper, the performance of an extended star -grid is studied. The power distribution between the star -bars and the net is done in two. level approximation i.e. the impedance matrix of the star -grid is assumed to be a 'big-. n' where n is the number of rectifiers, is the capacitor voltage rating and is the shunt. optimization problem is solved by using a branch-and-bound. the electrical load can also be matched to the maximum power point of the power.
