LinuxStruggling over what to do with the leftovers from Thanksgiving? Right now, the U.S. is not the only country with a shortage of breast milk for nursing moms. There's also a shortage of bovine milk for those who can't or won't breastfeed. And there are very few refrigerators large enough to store it in, since refrigerators aren't that big. Some mothers around the world have the answer to that problem. Mother-to-mother

groups are spreading word of a new invention: a compact breast pump that you can hang on your back or stick into your bra. "We are rapidly reaching a world where it will be impossible to feed a baby without a cow" Mother-to-mother groups in Brazil, Argentina and the Philippines have been working with La Leche League International and the World Health Organization to develop the invention. The Breast Pump

from Bigmama makes pumping milk so simple that a grandmother could do it, and it doesn't require electricity, unlike conventional breast pumps. And it's portable, making it easy to take on 5b5f913d15
