I've read it twice and plan on reading it a third time. As a follower of G. K. Chesterton, I love how Isaac Asimov explores all aspects of argumentation and popular debate. As such, this book is a wonderful compilation of Chesterton's thoughts. It would be great to see Asimov's overview of whether or not Chesterton was a Bertrand Russell type anti-realist. Asimov collects Chesterton's published comments about various arguments he has encountered in his career including more than a dozen articles Chesterton wrote, as well as his book on the topic. As I read this book, I realized that Chesterton was well versed in the history of Christianity as well as other historical religions. Chesterton also had a keen view on the philosophy of history and natural history. Chesterton's awareness of the various aspects of human civilization was amazing. What makes this book so enjoyable to me is that Asimov includes personal diary entries and letters written by Chesterton. He is a wonderful advocate of imagination and people. Asimov's introduction to the book perfectly discusses Chesterton's unique style. He wrote, "As I read the articles and watched him speak, I learned many things that I had not known before, but which would have meant little to me had I not read it. And I came to know a man who, in one brief lifetime, had lived at the head of so many diverse movements and attracted such attention in the public eye that it seemed that all the governments of the world were being governed by him. This book chronicles the rise and fall of G. K. Chesterton. That the fall was very great and nearly complete by the time I wrote it is cause for both sorrow and fear." Asimov reprints some of the 'Chesterton On Everything' speech which was delivered by Chesterton at an event at the Salisbury Playhouse, prior to the first of his two world tours in 1922. This book is primarily a compilation of Chesterton's best articles discussing many aspects of historical Christianity, great thinkers, education, and natural theology. In addition to his original articles, he includes a number of comments he's made on his critics. He includes his opinions on the Gifford lectures and lectured in America and Canada in November of 1922. As such
