Some studies have suggested that antioxidants may be useful in the treatment of gastritis. We have reported the results of a pilot study using ranitidine, omeprazole and vitamin C and E in the treatment of 20 patients with chronic gastritis. Ten patients were treated with ranitidine and omeprazole alone for 10-15 days with a relapse-free rate of 20%, all having a grade III lesion. Five other patients were treated with omeprazole
