KeyMacro is a safe and easy to use macro program for Windows. It saves the recorded keysstrokes and stores

them in the clipboard for later retrieval. You can repeat them without typing them, define them as you like or even export them into a text file. Wow, I was about to buy Windows Live Movie Maker and had found a couple of reviews on a little Amazon.co.uk that made it sound like it was a good choice. But then the reviews started to get really negative. [Thanks to everyone who sent this in]

Many of the people who bought it are complaining about the program simply not working or that it doesn't do what it's meant to do. On the other hand there are plenty of people who have installed it, who like it and think that it works well. It seems to me that these are two separate markets. So what if it's a bit buggy at the moment? Perhaps that's the way that it's meant to be. Or perhaps if the people who

are buying it don't work with it then it doesn't need to be perfect. I like the idea of having a few alternatives. I have written several software products and I've worked with most of the large names in the software industry. I have a good idea about what works and what doesn't work and how it works. So when I talk about this product I can give you the right advice. Some of you have probably bought this software but

don't know what to expect. Perhaps you've bought it and it's just a bit buggy, or it doesn't do what you expect, or you don't really know how to use it. That's why I'm writing this article. Because I've never heard of KeyMacro until I went on Amazon.co.uk and read a couple of reviews. I was about to buy Windows Live Movie Maker and had found a couple of reviews on a little
