How to Unlock Rooting on Xiaomi Redmi Note 7 Pro and Xiaomi Mi 10 SE. Read the full article in the Authentic Android Blog : recreate a table or two with insert into on oracle 11g i created a table inside a transaction and deleted it afterwards. now i want to recreate it with select into. it tells me TABLE or view does not exist and i see that the delete is invisible. so, how can i just recreate the table, but not its data. maybe using select into? i don't want to delete all existing data. i just want to replay everything like before (i mean rename, drop, recreate etc.), and not delete and recreate data, but just recreate the table. A: You can't recreate a table (dont you understand that you just deleted it?) So you'll have to do a recreate and select into. create table dummy as select \* from your\_old\_table; select \* into new\_table from dummy; and all that. 1. Field of the Invention This invention relates to a material for producing a highly conductive sintered body. The sintered body of the invention is preferably used as a substrate of a diffusion type semiconductor device, but may be used in various other fields. 2. Background Art Devices of a semiconductor type have been used extensively. The devices are mostly based on the transmission or conversion of signals through movement of electrons in a semiconductor. Owing to the increase in the degree of integration of semiconductor devices, however, more refined and compact devices
