- View search results in various categories (such as Google, Facebook, YouTube, Wikipedia, Amazon, eBay, etc.) - Open a text file in your default text editor - View your favorite images - Look for articles from the Internet in your preferred format (HTML, PDF, TXT, DOC, PPS, RTF, CHM, ODT, XML, etc.) - Find your favorite words and check their definitions - Search for application files (EXE, RAR, ZIP) - Look for your favorite lyrics - View the contents of various folders - Download a file from a website (unblock) - View the contents of your default web browser cache folder - Search for web hosting - View images of your favorite artists (PNG, JPEG) - View lyrics of your favorite songs (LRC) - Search for web proxy servers - View the contents of your default web browser cache folder - Look for tools (FTP, SSH) - Find the most useful hacks for your favorite games - Download a file from a website (unblock) - Find relevant search results - Search the contents of your default web browser cache folder - Search for your favorite apps - Find the latest updates for your favorite websites - Download images of your favorite artists (PNG, JPEG) - Find the most useful hacks for your favorite games - Download a file from a website (unblock) - View the contents of your default web browser cache folder - Search for web proxy servers - Search the contents of your default web browser cache folder - Look for your favorite words - View your favorite fonts - Search for your favorite artists - Download the latest update for your favorite applications - View images of your favorite artists (PNG, JPEG) - View your favorite lyrics - Download the latest update for your favorite web sites - Search for web proxy servers - View the contents of your default web browser cache folder - Look for the latest updates for your favorite applications - Find the most useful hacks for your favorite games - Download a file from a website (unblock) - Find the most useful hacks for your favorite games - Download a file from a website (unblock) - Find the latest updates for your favorite applications - Search the contents of your default web browser cache folder - Search the contents of your default web browser cache folder - Look for your favorite words - View

Google Hacks [2022-Latest]

Simplify the process of changing system menu shortcut keys. KEYMACRO License: GPL v2 or later KEYMACRO Website: == KEYMACRO Overview: Keyboard Shortcuts is a small application for Windows that allows you to create a keyboard shortcut for any system menu key and trigger it. The application comes with a number of system menu options: Explorer, View, File, Internet, Control Panel, Help and Run. You can use the application to quickly create system menu shortcut keys for any application that requires one. It can be used to trigger the start menu (Win7, 8, 10) and System Tray (Win7) shortcuts. In addition, it can be used to

create shortcut keys for other miscellaneous system tools such as the keyboard control panel or create a trigger for the search tool. Please note that this application can also be used to create more advanced hotkeys and control actions. KEYMACRO Features: * System menu keys: Create shortcut keys for any system menu key including Run, Control Panel, Help, View and File * Customize shortcut keys for any application by entering the application's full path * Create and edit shortcut keys for the keyboard control panel * Create and edit shortcut keys for the system tray * Create shortcut keys for any miscellaneous application * Create keyboard controls and hotkeys for any action * Customize hotkey trigger criteria * Customize hotkey trigger time intervals * Create hotkeys for regular expressions and complicated strings * Create and edit hotkeys for macro actions * Create and edit hotkeys for scheduled tasks * Create and edit hotkeys for almost any other actions * Create hotkeys for web browsers * Create hotkeys for mail readers * Create hotkeys for documents readers * Create hotkeys for virtually any application * Create and edit hotkeys for links * Create hotkeys for YouTube * Create hotkeys for Google * Create hotkeys for Facebook * Create hotkeys for Skype * Create hotkeys for other web services * Create hotkeys for your webcam * Create hotkeys for your voice recorder * Create hotkeys for recording music * Create hotkeys for applications * Create hotkeys for the printer * Create hotkeys for Word, Excel, Powerpoint and other office applications * Create hotkeys for your favorite web browsers * Create hotkeys for your favorite 1d6a3396d6

Google Hacks Crack + For Windows (Latest)

Google Hacks is a small application that enables you to perform custom searches for various Google services without accessing the designated web pages. Select between different search types The application allows you to choose from 12 custom search types including: Music, Book, Video, Tools, Hacks, Proxy, Lyrics, Fonts, Application, Torrent, Cache and Web hosting. Each category comes with additional options that will refine your search and make it even more accurate. Search via your default web browser All you have to do is enter the desired search string and press the Search button. The application will automatically open your default web browser and search for the entered string. Look for items by file extension If you want to search for a specific song, you can choose the Music section along with the desired file type (MP3, WMA, OGG). Books can be easily found even by the type of their extension (PDF, TXT, LIT, RAR, DOC, RTF, CHM, PPS, ZIP or ODT). With Google Hacks you will be able to search for specific videos even by their file types. Just select the Video option, the desired file types you want to search for and the application will do the rest. During our tests the utility managed to find somewhat accurate results for our search terms. Find your favorite lyrics, fonts and tools Google Hacks also allows you to search for the lyrics of your favorite songs by selecting the Lyrics option and entering the desired song title or artist name. Fonts can also be found easily using this utility, just type your search query and the program will instantly find related fonts. Do you need to search for specific applications? With Google Hacks the trouble is over. By selecting the Application option you can choose the file types you need to search for: EXE, RAR, ZIP or DDL. Bottom line If you need to perform custom searches or just want to quickly find music, books, videos and other stuff, Google Hacks may come in handy. Google Hacks (free) Instructions: 3.1.3.21: Google Hacks is a small application that enables you to perform custom searches for various Google services without accessing the designated web pages.
