KEYMACRO is a handy utility that enables you to record keyboard actions in several predefined modes. The program supports several input devices, such as the Microsoft Windows desktop keyboard, an Apple Macintosh keyboard, and an IBM compatible keyboard. The program is designed in a compact layout and sports a friendly interface that gives you the opportunity to configure it with just a few clicks. In the options window, you can select the recording mode, specify the macro length, set the maximum number of characters that will be recorded, and choose the preferred language. Spelling Bee Product Key Me doesn't have many options, but all of them are perfectly adequate to meet most of your demands. You can easily record keyboard events such as typing, pressing a button or moving the mouse. Once you have created a macro, you can edit it directly from the recording window, save it, and apply it to various options. The latter can help you make several keyboard shortcuts that can be used to activate advanced software functions. For instance, you can assign a single macro to activate one of the most important options of the standard Windows operating system. To make the program function even better, you can install additional dictionaries. The dictionaries you select will be downloaded from the web and they are installed automatically once you launch the program. The program runs quietly, so it doesn't affect your overall computer performance. As it would be expected from such a small utility, it carries out its task quickly, and no errors appeared during the entire process. The main drawbacks of Spelling Bee Me are its limited functionality, as well as its lack of features.
