pis cinerasilis Common names: thick-billed yellowthroat. The *pis cinerasilis* (Mammalian Trust - Family Passeridae) is a yellow-throated flycatcher of the family Passeridae, found in central Chile. The species was described by Christian Ludwig Brehm in 1845. Brehm (as cited in Ives (1934)) considered this species a separate species from the yellowthroat, which he described as *Coccothraustes chloris* (or *chloris* as was also stated in the entry in the Handbook of the Birds of the World). The populations of the bird are now considered conspecific, but the colour of the head of the yellowthroat is similar to that of the *pis cinerasilis*. Description The male and female are alike in appearance. The adult is long and weighs. The bird has a long black bill, and yellow throat and underparts. The eyes are green and the bill is black. This species is similar to the *pisangas* and the yellowthroat, but the latter species is smaller, has a brighter yellow head, and is more slender. The *pis cinerasilis* also has a lighter belly and undertail coverts. Behaviour The *pis cinerasilis* forages on the ground, feeding on spiders and other insects. Taxonomy In 1925 the yellowthroat was considered a subspecies of the *pis cinerasilis* by Martin Oring and other authors. In his 1928 edition of *Aves*, Konrad Lorenz stated that the two species were the same. However, in his 1985 edition of *Systematics and Evolution*, he removed this, and described them as different species. References External links Animal Taxonomy - click on the birds and you can read more about the differences between the species *pis cinerasilis* Category:Birds of Chile Category:

What's New In?

The easy way to open Google Drive online Google Panels provides one-click access to all of Google's services, enabling you to load the Gmail account or access files on Google Drive with just a mouse click. With its help, you can launch Google's online services without having to use a web browser. Access Google's services via the system tray Once installed on your computer, this application places itself in the system tray, enabling you to configure its behavior and view the panels via the left and right-click menus. Google Panels makes it possible for you to open Google Keep to take notes and save them online, Gmail to read messages you received and send e-mails to your contacts, as well as Google Calendar to mark important events and future appointments. Additionally, it enables you to launch Google's translation service, Google+ and your Drive account, where you can manage files stored in the cloud. When one of the available panels is opened, a new window is displayed, enabling you to use the service just as if it were opened in a browser, except the fact that there is no address bar to go to another website. Opens multiple panels simultaneously Pressing the 'X' button in the upper right of the window does not actually close the panel. Active panels are marked with green in the main menu, whereas closed ones are marked with gray. By default, they are not shown in the taskbar, but there is an option specifically designed for this purpose. Configuring the settings of this application is a bit more difficult, considering you must edit a JSON file. It features proxy support and allows you to disable one or more panels you don't need, modify the initial state of the panel window, its size and position on the screen. A faster and more convenient way to open Gmail and other Google services Google Panels helps you launch Gmail and other Google services much easier, without having to write the corresponding address in the browser's bar. Using a simple icon in the system tray, you can check your mailbox, translate a text, review your appointments, take notes, talk to your friends and upload files to the cloud for safe keeping. Features: Version: Google Panels 2.7.0.59 Size: 60.6 KB MD5: 3ccc1b0bb2cc3aaf8f1c0e0dce1fce7b Description: # The easy way to open Google Drive online Google Panels provides one-click access to all of Google's services, enabling you to load the Gmail account or access files on Google Drive with just a mouse click. With its help, you can launch Google's online services
