### Features: Fast and Powerful DX 3D Graphics

DX Studio provides a fast and powerful DirectX 3D graphics library to enable fast and simple modeling and texturing of 3D models. You can load real-world and self-made 3D models, with support for both DX9 and DX10 formats. You can easily add your own lighting and shading effects, texture and stencil layers, etc. Models created with the DX Studio system are as easy as those built with your own environment.

### Real-Time Editing of 3D Models DX

---

Studio has a special real-time editing engine for instant updating and manipulation of meshes. The system supports a number of basic editing operations, such as scaling, rotating, moving, deleting and flipping, and it is easy to use JavaScript or C# to update meshes in real-time. Scripting Interface DX Studio provides a powerful scripting interface for creating real-time applications, simulations and games. It includes built-in support for JavaScript, C# and Visual Basic
